PROFESSIONAL SUMMARY

Full Stack Web Developer specializing in Django and React, with a strong foundation in building scalable, secure, and user-focused web applications. Experienced in designing RESTful APIs, integrating frontend-backend systems, and managing both SQL and NoSQL databases. Proven ability to deliver end-to-end solutions with responsive UI, robust backend logic, and real-time features. Passionate about clean code, performance optimization.

TECHNICAL SKILLS

- **Backend Technologies**: Django, Node.js
- **Frontend Technologies**: React.js, HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, Sass
- **Databases**: MongoDB, PostgreSQL, SQLite
- **Programming Languages**: Python, JavaScript, C
- **Soft Skills**: Team Leadership, Creativity, Attention to Detail
- **Version Control**: Git
- **Tools:** VS Code, Postman, Netlify

WORK EXPERIENCE

Full Stack Python Developer Intern

Srishti, Trivandrum | June 2025 – Present

- Learning and applying full-stack Python development (Django) under industry mentorship.
- Collaborating on live projects involving database design, API integration, and frontend-backend synchronization.
- Gaining hands-on experience with Agile workflows, code reviews, and deployment pipelines.

Java Full Stack Developer Intern

White Track Technologies, Trivandrum | July 2024

- Completed an intensive 5-day Java Full Stack internship focused on front-end and back-end workflows.
- Built responsive interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Developed dynamic frontend components integrated with Java backend logic.
- Collaborated in coding tasks and adopted best full stack practices.
- Built 15+ responsive UI components using HTML/CSS/JavaScript, reducing client-side load time by 30%.

Freelance Full Stack Developer

February 2023 – Present

- Delivered custom web solutions using React and Django for diverse clients.
- Handled complete lifecycle: requirement gathering, development, testing, and deployment.
- Built projects with real-time data, authentication, and media handling.
- Architected and deployed 5+ full-stack web apps with integrated auth and real-time features.

- Delivered custom React/Django solutions for e-commerce clients

EDUCATION

BTech in Computer Science and Engineering

Vidya Academy Of Science And Technology Technical Campus | November 2021 – April 2025

- Relevant Coursework: Database Systems, Data Structures & Algorithms, Software Testing, Web Technologies, Blockchain Basics.

CERTIFICATIONS & TRAININGS

UI Engineer Training – Steyp | August 2024 – March 2025

- Gained proficiency in HTML, CSS, JavaScript, Git and GitLab.
- Built responsive UIs using jQuery, Bootstrap, and SASS.
- Developed SPAs using React and learned PWA features.

React Training – Internshala Trainings | September 2023 – October 2023

- Completed 8-week course on React functional components, hooks, and state management.
- Final score: 80%.

HTML & CSS Certification – Udemy | Completed October 2022

- Structured semantic pages and built responsive layouts using HTML5 and CSS3.

ACHIEVEMENTS & ACTIVITIES

- **Campus ambassador** – College Fest
- **Volunteer** – NCC and Disciplinary Committee
- **Member** – College Technical & Cultural Committees

PROJECTS

Pharmaceutical Supply Chain Using Blockchain

August 2024 – April 2025

- Designed a blockchain system to improve traceability and transparency in pharmaceutical supply chains.
- Prevented counterfeit drugs using transaction verification and secure recording.
- Tech used: Node.js, MySQL, Ethereum

Enhanced Cryptographic Toolbox

January 2024 – March 2025

- Created custom encryption algorithms for secure text-based communication.
- Enhanced message confidentiality with resistance to cryptographic attacks.
- Tech used: Django

Smart Expense Tracker

Personal Project

- Developed a feature-rich tracker with split payments, lend/borrow, summaries, and filters.
- Included tools like fuel calculator, calculator, and real-time graphs.
- Tech used: Node.js, React, Sass

Task Management Web App

Personal Project | Present

- Engineered a full-stack task manager using Django with user authentication, session management, and advanced task handling.
- Integrated trash logic with 15-day soft deletion and task completion filters.
- Tech used: Django, SQLite
